

PTFF-3 – “Diesel Fuel Supply, Yukon”

The Mayo Settlement in the Yukon, requires a monthly supply of diesel fuel for its generating plant and vehicles. Platinum Airways is contracted to fly in diesel fuel and in addition return unserviceable electrical plant for repair at Yellowknife.

Suggested Aircraft:

Dash8-Q400 or similar aircraft.

Flight Schedule:

1. Load diesel fuel (50 gallon drums) at Deline (CYWJ) and deliver to Mayo (CYMA) and offload – 335nm.
2. Load unserviceable, emergency generator (325Kg/715lbs) at Mayo and return item to Yellowknife (CYZF) for repair – 584 nm.

NOTAMS:

Runway at Deline has a gravel surface and a length of 3,912 ft. Dash8-Q400 at MTOW of 36,300 lbs requires a takeoff run of 4,600 ft. Adjust fuel/payload accordingly.

One gallon of diesel fuel weighs approximately 7 lbs.

Runway length at Mayo is 4,837 ft.

Total flight distance 919 nm.
